

Subject-What to do post boil water advisory

- Run cold water taps until the water feels cold, one minute or more, before returning to normal use
- Flush your hot water lines, 15 minutes for a 40 gallon water heater and 30 minutes for an 80 gallon water heater or larger
- After flushing your water lines, empty your dishwasher and run it one time
- Dispose of water in humidifiers if they were filled with water during the advisory
- Dispose of all ice made during the advisory and run your automatic ice makers through a 24 hour cycle and dispose of that ice as well
- Dispose of all baby formula or any other foods/drinks made during the advisory
- Flush one quart of water through your refrigerator water dispenser or refer to your manufacturers specifications of the capacity of your dispenser and flush that amount
